## WATER TREATMENT SYSTEMS

Reverse osmosis under sink system without storage tank

### IDROPUR LED MODEL

Elegant and attractive shape without external screws (fastening with internal captive screws). Steel powder coated chassis measuring pressure manometer. Easy opening for maintenance (single screw).

#### Filters:

N° 1 sediment filter

N° 1 carbon block filter

Membranes: N° 2 – 150 GPD

Exclusive water cooled engine – power 200 W (does not heat, can be used continuously also in closed places without air recirculation).

300 Lt/hr. Fluid-o- tech pump

Electronic control unit: filters, conductivity, anti-flooding sensor, engine delay, ignition, shut-down. Recirculation system. Automatic flushing.

#### TECHNICAL CHARACTERISTICS

Nominal production 90-110 Lt/hr. (product varies with salinity, net pressure, and water temperature). Working pressure 9-10 bar. Power supply 230 V – 50 Hz.

Dimensions mm H 425 – L 175 – P 400.

N.B. can be installed horizontal and under skin
