WATER TREATMENT SYSTEMS

Reverse osmosis under sink system without storage tank

IDROPUR LCD MODEL

LCD Display that allows the control and the adjustment of all the functional phases in the machinery. Beautiful and elegant without external screws (fastening with internal captive screws). Easy opening for maintenance (single screw).

Filters:

N° 1 sediment filter

N° 1 carbon block filter

Membranes: N° 2 – 150 GPD

Exclusive water cooled engine – powder 200 W (does not heat, can be used continuously also in closed places without air recirculation).

300 Lt/hr. Fluid-o- tech pump

Electronic control unit: filters, conductivity, anti-flooding sensor, engine delay, ignition, shut-down. Recirculation system. Automatic flushing.

TECHNICAL CHARACTERISTICS

Nominal production 90-110 Lt/hr. (product varies with salinity, net pressure, and water temperature). Working pressure 9-10 bar. Power supply 230 V – 50 Hz

Dimensions mm H 425 – L 175 – P 400.

N.B. can be installed horizontal and under skin
